

EDUCORE INDONESIA

Design System and UI Specification

Foundations, component library, interaction patterns and screen mockups for the school operating system. Paired with the functional specs in `/specs`.

VERSION

1.0 — September 2026

SURFACES

**Web admin · Teacher suite · Parent
mobile · POS · Kiosk**

IMPLEMENTATION

**Django templates + HTMX + Tailwind ·
React Native**

Design principles

Red is for action

Brand red marks the single most important action or figure on a screen. If three things are red, nothing is. Everything else is ink on white.

Numbers are the interface

Bendahara and Ketua Yayasan read figures, not prose. Money and counts get tabular mono type, right alignment and generous size.

Built for a 3G phone

Every screen states its loading, stale and offline condition explicitly. Silence is never an acceptable state.

Bahasa Indonesia first

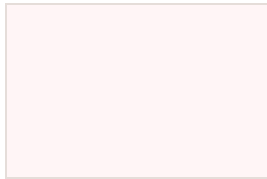

Indonesian is the source language; English is the translation. Layouts allow 30% text expansion without breaking.

02 — FOUNDATIONS

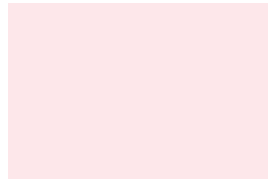

Colour

A white-dominant surface with a single saturated red drawn from the Indonesian flag.
Neutrals are warmed slightly so large white areas read as paper, not screen glare.

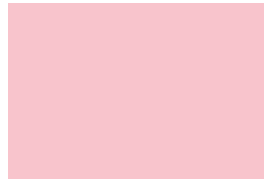

BRAND — MERAH

brand-50
#FFF5F6

brand-100
#FDE7EA

brand-200
#F8C4CC

brand-600 · primary
#C8102E

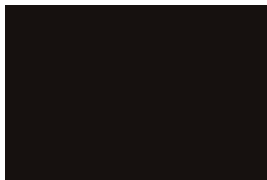

brand-700 · hover
#A50D26

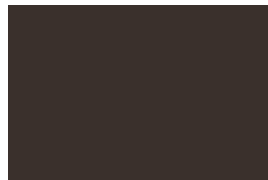

brand-800 · active

surface
#FFFFFF

SEMANTIC — NEVER THE BRAND RED

success · lunas #0E7A4F on #E6F4EE	warning · jatuh tempo #B56A00 on #FDF1E0	danger · destructive #B3261E on #FCE9E7	info · sistem #1B5FA8 on #E8F0FA
--	--	---	--

Critical rule. Brand red #C8102E means *primary action*. Destructive actions use #B3261E, which is visibly browner and always paired with a confirm dialog. Never use brand red to signal an error.

ATTENDANCE STATUS — FIXED VOCABULARY FROM SPEC 05 §3

● HADIR	● TERLAMBAT	● SAKIT	● IZIN	● ALPA	● DISPEN
----------------	--------------------	----------------	---------------	---------------	-----------------

Every status carries a dot *and* a label — colour is never the only carrier of meaning. The same six tokens are used identically in web, mobile and printed rapor.

Typography

Aa

Plus Jakarta Sans

Headings, page titles, KPI figures.
Weights 700/800 only.
Indonesian-designed typeface —
a deliberate choice.

Aa

IBM Plex Sans

All interface text, labels, tables,
forms. Weights 400/500/600.
Excellent at 14px on low-DPI
Android.

123

IBM Plex Mono

Money, IDs, timestamps, codes.
Tabular figures so columns of
rupiah align on the decimal.

display / 48-64

Rp 1.482.500.000

Aisyah Putri masuk sekolah pukul 06.55 melalui Gerbang Utama.

Default UI text

small / 13

Diperbarui 4 menit yang lalu

Meta, helper, freshness

label / 11 mono

NISN · 0071234567

Overline, data key

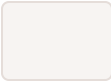

Minimums. 13px web body floor, 14sp mobile floor, 12pt in printed rapor and payslips. Line length capped at 75 characters. Never centre a paragraph longer than two lines.

Space, shape, elevation

SPACING — 4PX BASE

	4 · icon gap
	8 · label to field
	12 · inline group
	16 · card padding sm
	24 · card padding
	32 · between cards
	48 · section gap
	64 · page gutter

RADIUS

	0 · cards, tables, panels
	4 · buttons, inputs
	full · avatars, dots

Square containers are the house style — it reads as institutional and administrative rather than consumer-app soft.

ELEVATION

	flat · border only — default
	raised · dropdown, popover
	overlay · modal, drawer

Shadows convey layer, never decoration. A card on a page has a border, not a shadow.

Component library

Buttons

40px tall on web, 48px on mobile and POS. One primary per view.

Interaction and accessibility

STATES EVERY SCREEN MUST DEFINE

Loading	Skeleton matching final layout. Never a centred spinner on a full page.
Empty	Explain why it is empty and give the action that fills it.
Stale	"Diperbarui X menit lalu" on every cached or rolled-up figure.
Offline	Persistent banner. Writes queue visibly; reads show last-known with a timestamp.
Error	Plain Indonesian, what happened, what to do next. Never a raw error code alone.

ACCESSIBILITY FLOOR

Contrast	4.5:1 body, 3:1 for text 24px and above. White on #C8102E passes at 5.9:1.
Targets	44dp minimum on mobile, 48px on POS and kiosk where hands are wet and fast.
Focus	2px #C8102E outline plus 2px offset. Never removed, never colour-only.
Text scale	Layouts survive 200% text without clipping or horizontal scroll.
Motion	120–200ms ease-out only. Honour prefers-reduced-motion. No decorative animation.

Handoff

Tokens compile to a Tailwind config consumed by Django templates and mirrored in the React Native theme file. Component markup lives in `frontend/templates/components/` as HTMX-ready partials. Every component here maps to one partial; no screen invents its own variant.
